CCSI
CUSTOM CABLE SOLUTIONS, INC.
ENGINEERED CABLE ASSEMBLY SOLUTIONS

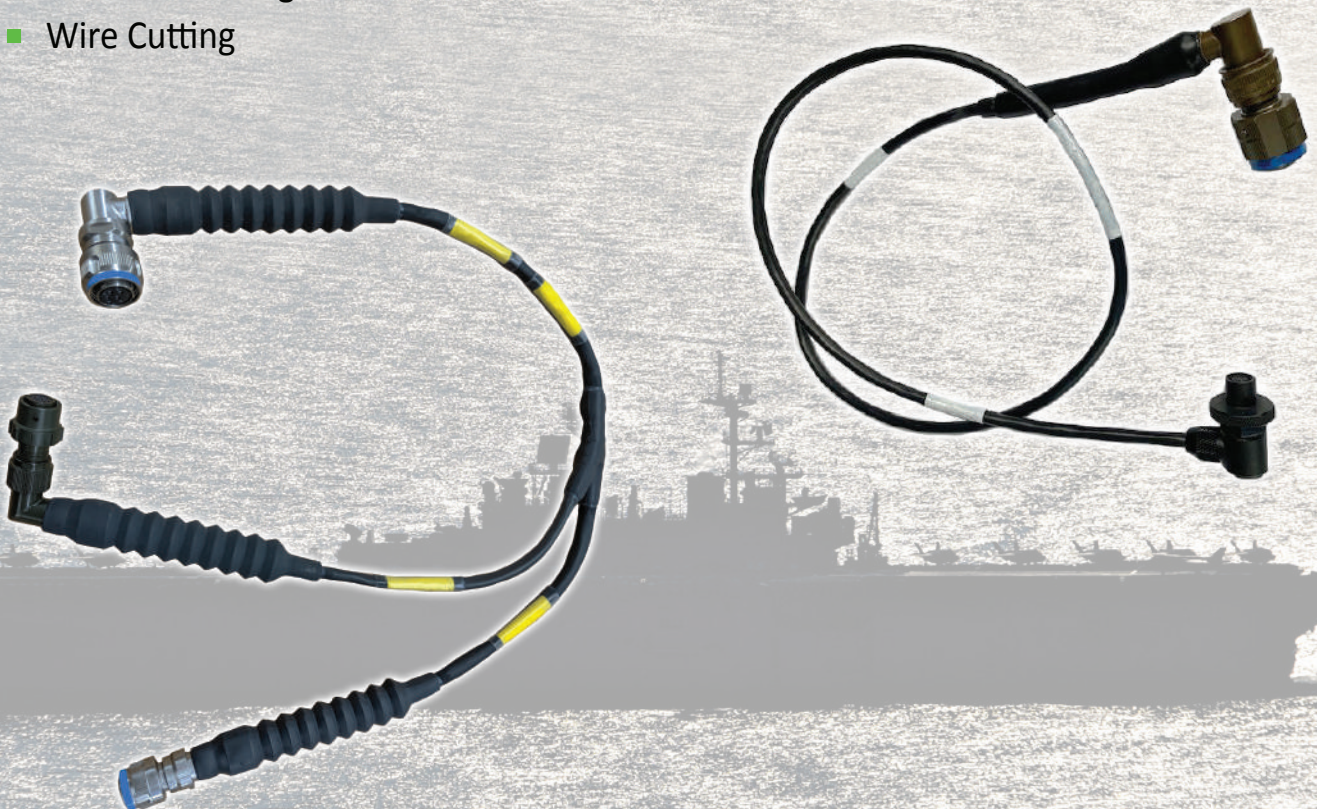

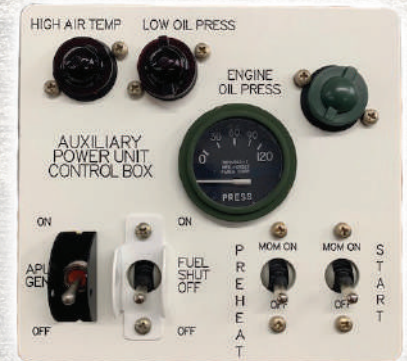

ENGINEERED CABLE ASSEMBLY SOLUTIONS

We specialize in demanding, harsh environment military and aerospace applications and are certified to the highest level of quality initiatives. All assemblies utilize factory-new, traceable components and materials, and are made in the USA.

Production Services Include:

- Point to Point Assemblies
- Cable Harness Assemblies
- Overmolded Cable Assemblies
- Wire Harness Assemblies
- RF Cable Assemblies (Coaxial, TriAxial, Semi-Rigid)
- Solder and Crimp Applications
- Box Builds
- Panel Builds
- Electro-Mechanical Assembly/Chassis Wiring
- Custom Labeling
- Wire Cutting

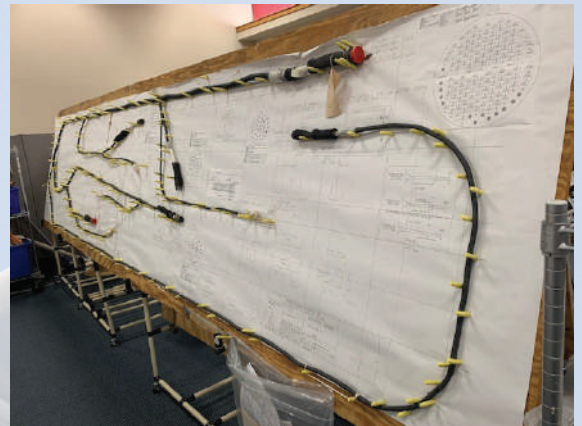

QUALITY ASSURANCE YOU CAN COUNT ON

All manufactured products are 100% inspected before leaving our facility for delivery. Throughout the manufacturing process we implement quality checkpoints to evaluate products at all stages of production. Manufacturing is monitored through our MRP system from beginning to end, with each production run assigned a work-order number allowing our staff to track material throughout all phases of manufacture and testing.

Quality Programs Include:

- ISO 9001:2015 Certified
- AS9100D Certification
- IPC-WHMA-620 / J-STD-001 Military-spec Certification
- ITAR Registered
- In-Process Testing
- First Article Inspections
- Complete Final Testing

ACCESS TO ENGINEERING SUPPORT

Working with Custom Cable Solutions, Inc. means full access to our engineering support team. Our team is professional, experienced, and knowledgeable, well able to tackle industry challenges. Our engineers can also help with design support to assure your end product meets your requirements and exceeds your expectations.

Engineering Services Include:

- Design Capabilities
- Production Technical Support
- Reverse Engineering
- Prototyping
- LRIP Phase
